MOD files have been offered by sylenth1. The new sylenth1.MOD files and the new Amorphage Sonata Kit make it possible for everyone to enjoy high quality presets for sylenth1. 16 sounds are offered with the Sonata Kit. All presets use the presets from Vintage Jupiter Kit (A1) as a starting point. This patch is for the main presets of Jupiter (each preset is an instrument) -All patches have a great resonance quality (soundstage and articulation). A different resonance is used for each patch.-The patches are made up of 5 partials each with a different resonance.The short multiples for each of the 5 patches are approx. 100 ms longer and have a higher resonance.-New Library Added - Jupiter Harmonics (KM) - Modulated Harmonics (KR) - Different Db's (QR) Download and Install in your plugin folder by pressing the reload button in the vst-plugin-editor (VSE) or going to the plugins folder in Fruityloops. If you don't have a plugin folder yet, go to "Window > Plugin Manager" or hit Ctrl+Shift+F and install the plugin there. Installing plugins from e.g. Fruityloops has the advantage that you can always go back to the original versions. VST - Synthesizer - Sylenth1 - 12.04.3 The current version (12.04.3) is already compiled with plugin-instructions for lantiq_v3 and lantiq_v2. In case you want to use this patch on your micro-controller please make sure to check the "USB_mode" in the makefile. If you have problems during the installation on a micro-controller please contact me. The installation instructions are located in the readme.txt in the zip-file. FAQ What are you going to do? I want to create sounds to fit every modern situation and give you a familiar platform to explore new ways of creating sounds. What is meant by the "soundbank"? A soundbank is a custom library which contains a collection of carefully hand picked presets. These presets are ready for use, i.e. they are edited and optimized to provide the best possible sound. A soundbank can be applied to any number 82157476af
